

Kimberly Cano

IT Systems Administrator – Multi-Site K-12 Environment

Chicago, IL
kim@kimtechhq.com
1 (708) 341 - 0510

SUMMARY

Systems and Network Administrator with 4+ years of hands-on experience supporting multi-site K-12 environments serving 1,500+ users. Proven background in endpoint management, identity and access support, network troubleshooting, and incident response in resource-constrained environments. Actively pursuing Security Operations roles with a focus on detection, response, and reducing real-world risk through practical defensive controls.

EXPERIENCE

Systems & Network Administrator (Sole On-Site IT) — Alltech Solutions, Pathways in Education, Chicago, IL February 2022 - Present

- Operated within a **multi-entity nonprofit education network** with centralized administrative services supporting multiple campuses.
- Serve as the **primary and sole on-site IT administrator for four school campuses**, operating and securing environments for 100+ staff and 1,500+ students across instructional and administrative environments.
- **Administer and troubleshoot** Windows, macOS, and Linux endpoints, enforcing consistent configuration, patching, and access controls to reduce operational and security risk.
- **Configure, maintain, and monitor network infrastructure** including switches, wireless access points, printers, and edge devices; troubleshoot connectivity, authentication, and segmentation issues.
- Act as **first responder for security-relevant incidents**, including compromised accounts, malware-infected endpoints, misconfigurations, and service outages; perform containment, remediation, and root-cause analysis.
- Support identity and **access management** across Microsoft 365 and Google Workspace environments, including account provisioning, deprovisioning, MFA support, and permission troubleshooting.
- Provide after-hours and cross-time zone operational support in coordination with a remote IT team, ensuring **continuity of services** during incidents and outages.
- Documented incidents, procedures, and user guidance to reduce repeat issues and accelerate recovery during operational and security events.
- Prioritize and **respond to concurrent operational and security incidents** in a high-availability educational environment with limited on-site redundancy.

CERTIFICATIONS & EDUCATION

- **Advanced Cybersecurity Certificate** — *City Colleges of Chicago*
- **Cybersecurity Associate Degree (In Progress)** — *Expected Spring 2026*
- **Coursework in Computer & Electrical Engineering** — *Illinois Institute of Technology*
- **Computer-Aided Design (CAD) Certificate** — *City Colleges of Chicago*

SECURITY & SYSTEMS SKILLS

- Endpoint administration across **Windows 10/11, macOS, and Linux** environments
- **Identity & access management** in Microsoft 365 and Google Workspace, including account lifecycle support
- **Network infrastructure and troubleshooting** (DHCP, DNS, switching, wireless, segmentation) using UniFi, Cisco, and Peplink equipment
- **System imaging, virtualization, and recovery** using Hyper-V, VMware, VirtualBox, and Linux-based hypervisors for testing, isolation, and rapid rebuilds of compromised or misconfigured systems
- **Incident response fundamentals**, including detection, containment, malware triage, account compromise remediation, and escalation
- Documentation, root-cause analysis, and use of **remote support and ticketing systems**
- Scripting & Programming: **Python (automation and scripting)**, C++ (systems fundamentals); learning Java
- **Languages**: English (fluent), Spanish (native)
